

KAMALAKANNAN R

Full Stack Developer | React.js & .NET Core | C# | REST APIs | Microservices | AWS | Immediate Joiner
Chennai, Tamil Nadu, India | 9942971768 | kamalakannan.rdev@gmail.com | linkedin.com/in/kamalakannan-r-0a48a4409

PROFILE SUMMARY

Full Stack Developer with 3+ years of professional experience designing, developing, and maintaining scalable web applications using C#, .NET Core, ASP.NET Core Web API, React.js, Vue.js, RESTful APIs, Entity Framework Core, SQL Server, and MongoDB. Experienced in end-to-end feature ownership, backend service development, frontend integration, API development, database optimization, cloud-based serverless solutions, and application modernization. Strong experience with microservices architecture, AWS S3, AWS Lambda, AWS Step Functions, JWT authentication, Dependency Injection, Repository Pattern, SOLID principles, LINQ, asynchronous programming, and Agile/Scrum methodologies. Proven ability to independently own application modules, deliver business-critical features within short turnaround times, troubleshoot production issues, optimize application performance, and collaborate effectively with cross-functional teams. Available for immediate joining and open to Full Stack Developer opportunities.

KEY ACHIEVEMENTS

- Sole Developer / Owner: Independently designed, developed, and delivered the TaxBandits ACA application module, including ASP.NET Core APIs and business logic.
- Pat on the Back Award: Recognized for completing the TEST Simulator Tool within a short given turnaround through strong individual contribution.
- Weekly Excellence Spotlight: Recognized for analyzing and implementing day- and time-based Drip Mail logic in the ACA application, demonstrating technical expertise, problem-solving, ownership, and cross-functional collaboration.
- Automation & Workflow: Designed an automated email reminder workflow supporting 2-day, 4-day, and pre-deadline triggers.
- Span Superstar Award: Received company-wide recognition for consistent, high-impact contribution.
- Application Modernization: Contributed to frontend migration and modernization efforts through Vue.js component migration

PROFESSIONAL EXPERIENCE

Span Technology Services | Coimbatore, Tamil Nadu

Software Engineer

June 2025 – Aug 2026

ACA Application — Sole Developer

- Independently owned the TaxBandits ACA application end-to-end using ASP.NET Core (.NET Core), C#, Vue.js, and Vuetify.
- Designed and maintained RESTful APIs, business logic, CRUD operations, data validation, and middleware for ACA filing and form processing.
- Built a serverless architecture with AWS Lambda, Step Functions, and S3 for bulk file upload and secure document storage.
- Implemented day- and time-based Drip Mail logic and an automated email reminder system with scheduled 2-day, 4-day, and pre-deadline triggers.
- Optimized SQL Server queries using Entity Framework Core (EF Core), LINQ, and stored procedures.
- Applied Dependency Injection, Repository Pattern, SOLID principles, async/await, JWT authentication, and MVC best practices for scalable, secure code.
- Handled bug fixing, performance optimization, and troubleshooting; collaborated in Agile/Scrum using Git, Azure DevOps, and Jira across sprints and releases.

Junior Software Engineer

June 2023 – May 2025

TaxBandits eFile — Team Member

- Developed and maintained features for the TaxBandits eFile platform using .NET Core, .NET Framework, C#, Worker Services, MongoDB, and SQL Server.
- Maintained the state and postal filing module, implementing filing logic and data processing requirements across state-level and postal workflows
- Developed the TEST Simulator Tool within a short turnaround time through individual contribution, receiving a company Pat on the Back Award.
- Built an automated eFile Demo/Simulation process that replicated the complete user filing workflow end-to-end.

- Developed file-generation functionality for TXT, CSV, and XML formats.
- Implemented backend services for data processing, validation, workflow automation, and file generation.
- Participated in the migration of frontend functionality from the existing framework to Vue.js.
- Collaborated with cross-functional teams to develop features, troubleshoot defects, perform testing, and deliver application enhancements.
- Supported application maintenance, debugging, defect resolution, and continuous application modernization

CORE COMPETENCIES

Programming Languages: C#, JavaScript, Node.js, XML, JSON

Backend Development: .NET Core, .NET Framework, ASP.NET Core, ASP.NET Core Web API, RESTful APIs, Microservices, Worker Services, Windows Services, MVC, Razor Pages

Frontend Development: React.js, Vue.js, JavaScript, TypeScript, jQuery, AJAX, Responsive Web Design

Database & Data Access: SQL Server, Entity Framework Core, Dapper, LINQ, MongoDB, PostgreSQL, Redis, Stored Procedures, Query Optimization

Cloud & DevOps: AWS S3, AWS EC2, AWS Lambda, AWS Step Functions, Jenkins, CI/CD Pipelines, Azure DevOps, IIS
Architecture & Development Practices: Microservices Architecture, Dependency Injection, Repository Pattern, SOLID Principles, Async/Await, TDD, Code Review, QA, API Documentation, Swagger/OpenAPI, JWT Authentication, Security Best Practices

AI Tools & Automation: Copilot, Codex, Claude, Git, Jira, Azure DevOps, n8n, Sentry, OpenReplay, Simulation Tools

EDUCATION

Bachelor of Electronics and Communication Engineering

Velalar College of Engineering and Technology | Final CGPA: 8.3 | June 2019 – April 2023

SOFT SKILLS

Ownership & Accountability | Problem Solving | Technical Troubleshooting | Cross-Functional Collaboration | Communication | Agile/Scrum | Adaptability | Attention to Detail | Time Management
